CHAPTER 1:
INTRODUCTION

Welcome to PepeHunt

The world's first live-streamed, real-frog betting experience powered by Web3.

Imagine placing a bet... and then watching it unfold in real-time as actual frogs race to capture a bug — live on camera. PepeHunt isn't just another meme coin or simulation; it's an interactive entertainment revolution, combining real-world randomness with decentralized betting on a transparent blockchain platform.

Our Mission

To gamify decentralized betting using real-life unpredictability while keeping it fun, ethical, and community-driven — one frog race at a time.

The Platform at a Glance

Players enter the arena, choose their frog, place their bets, and tune into the live-streamed action to watch nature take its course.

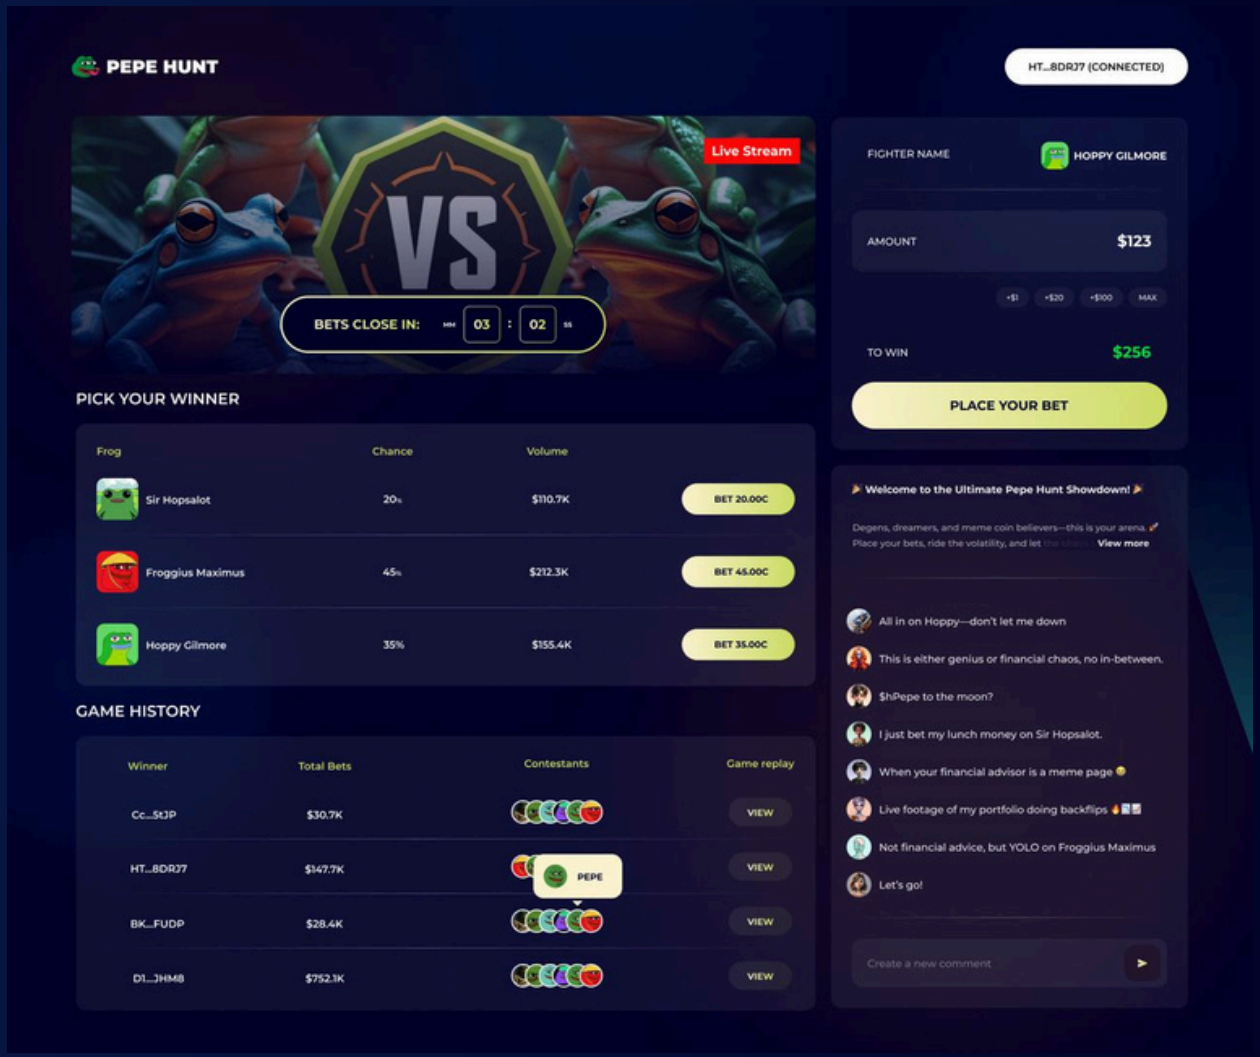
Whether you're here for the memes, the money, or the thrill — PepeHunt delivers a new level of engagement where:

- Luck beats skill
- Entertainment is live
- The $hPEPE token fuels it all

Why Now?

In an era where meme coins, AI, and live entertainment converge, PepeHunt launches at the perfect intersection. With Web3 culture hungry for novelty and randomness, we're giving the internet something it has never seen before: a betting game based on real animals — not code.

Platform Preview



CHAPTER 2:

WHAT IS PEPEHUNT?

A New Breed of Betting

PepeHunt is a next-generation, online multiplayer betting game—but it's unlike anything you've seen before.

Instead of algorithmic outcomes or virtual races, PepeHunt is powered by nature. Players place bets on which real frog will get to the bug first in a live-streamed event. The result? It is a fun, unpredictable experience that blends the charm of meme culture with the thrill of real-time wagering.

The "True Frog" Experience

This isn't a simulation.

- **Real Frogs** compete in physical, randomized environments.
- **Live Streaming** lets players watch the action unfold in real-time.
- **One Bug** is the prize — the first frog to get it wins the match (and the bettor gets paid).

This randomness isn't coded — it's organic. Every game is unpredictable because nature is unpredictable, which adds authenticity and fairness to every round.

A World-First Concept

While blockchain games and meme tokens flood the market, PepeHunt breaks the mold by introducing:

- **Physical-World Gameplay** integrated with digital betting
- **Humor-Driven Branding** paired with real rewards
- A **Meme-Friendly**, **Shareable Format** that's perfect for social media virality

"This isn't just another token — it's a show."

Why It's Unique

- **No Two Games Are the Same** frogs behave differently every match — it's true randomness that can't be rigged.
- **Watch to Win** real-time engagement means users don't just bet and forget — they watch, cheer, and share the action.
- **Built for Web3 Degens and Casuals Alike** whether you're in it for the laughs, the wagers, or the upside of $hPEPE, PepeHunt is designed for mass appeal.

More Than a Game — It's an Experiment

PepeHunt blends:

- Live content + crypto utility
- Betting + ethics
- Memes + motion

It's an entertainment finance experiment— everyone's invited to play.

CHAPTER 3:
HOW IT WORKS

Bet. Watch. Win.

At its core, PepeHunt is as simple as it is thrilling. Here's the basic flow:

- **Place Your Bet -** Choose the frog you think will win and place your $hPEPE bet.
- **Watch It Live -** Tune into the live stream and watch the real frogs race for the bug in a custom arena.
- **Celebrate the Winner -** If your frog gets to the bug first — you win the pot. Winnings are instantly distributed based on odds.

Real Frogs. Real Action.

Unlike typical RNG (random number generator) crypto games, PepeHunt's outcomes are determined by live animals in real time.

- Frogs are placed in a small arena with a single bug.
- Each frog has a unique color or name for betting.
- Players can visually track their chosen frog.
- The first frog to catch the bug wins the match.

No scripting. No manipulation. It's just pure chaos.

All frogs are ethically treated, rotated for rest, and live in a frog-safe habitat.

24/7 Streaming Arena

- Multiple games are run throughout the day.
- Players can bet before and sometimes during the match.
- Replays and highlight reels will be made available for community sharing.

Imagine Twitch meets Doge, with a little Frog Olympics thrown in.

The Odds System

PepeHunt uses a dynamic odds model inspired by decentralized prediction markets like Polymarket.

- Odds shift based on the number of bets placed per frog.
- More popular frogs have lower payouts.
- Underdogs (less bet-on frogs) have higher rewards.

This model ensures strategic excitement and fair value distribution.

Betting Flexibility

- **Pre-Game Bets –** Place your wagers before the race begins.
- **Live Bets –** Available in some games, adding thrill as the action unfolds.
- **Tournament Mode –** Coming soon, allowing bracket-style competition with massive prize pools.

What's Coming Next?

After launch, the PepeHunt platform will expand into:

- **Tournaments** with escalating rewards
- **Seasonal Frog Events** (holiday-themed arenas, special frogs)
- **Community-Hosted Games** where top holders can run their own matches

PepeHunt isn't just a game—it's a constantly evolving spectacle that blends luck, laughter, and liquidity

CHAPTER 4:
CORE FEATURES

1. Live-Streamed Competitions

At the heart of PepeHunt is its live betting arena, where players witness real frogs chase down a single bug in real-time.

- **No RNG —** You're watching nature take its course.
- **Every Match is Streamed,** allowing full transparency and entertainment.
- Shareable content = Viral potential

"Watch your frog jump into action — for real."

2. Decentralized Betting Market

PepeHunt runs on smart contracts that handle the following:

- Fair bet placement
- Instant payouts based on outcomes
- Dynamic odds shifting based on community behavior

The entire ecosystem operates on-chain — transparent, tamper-proof, and trustless.

3. Earn While You Play

No skills? No problem.

PepeHunt is built on luck-based mechanics, meaning:

- Anyone can win.
- There are no pro players or unfair advantages.
- It's betting, not gaming — and that levels the playing field.

Plus, participants can earn in multiple ways:

- Winning frog bets
- Staking $hPEPE
- Community giveaways and events

4. $hPEPE Token Utility

The $hPEPE token isn't just for betting — it's the backbone of the entire platform.

Use $hPEPE to:

- Place bets with **reduced fees**
- Participate in governance votes via the **Pepe DAO**
- Benefit from **Buyback & Burn mechanics** that support price growth

Holding $hPEPE grants early access to exclusive matches, NFT perks, and future tournament pools.

5. No Skill = No Gatekeeping

This isn't chess or poker — it's frogs vs. fate. That means:

- **Zero** barriers **to entry**
- Just pick a frog, place a bet, and enjoy the show
- No grinding, no complicated mechanics, no learning curve

Whether you're a crypto veteran or Web3-curious degen, PepeHunt is built to be inclusive and easy to play.

6. Community-Driven Growth

The community will shape the platform's evolution, from frog names to future arena designs, through governance votes.

- Meme culture + voting rights = next-level engagement
- PepeHunt is built with the community, for the community

With these features, PepeHunt becomes more than a betting game — it's an experience, an ecosystem, and a meme-powered movement.

CHAPTER 5:
$HPEPE TOKEN OVERVIEW

What is $hPEPE?

$hPEPE is the lifeblood of the PepeHunt platform — a utility-driven meme token that fuels gameplay, rewards users, and governs the future of the ecosystem.

It's not just a token to bet with — it's your ticket to participate, earn, and influence the entire PepeHunt universe.

Token Symbol: $hPEPE

- **Blockchain:** (To be confirmed — likely Solana or Base)
- **Type:** Utility & Governance Token
- **Total Supply:** [Refer to Tokenomics visual in Chapter 6]

Token Utility Breakdown

1. Betting Currency

Use $hPEPE to place bets in live frog competitions.

- Lower fees than stablecoin users
- Exclusive access to premium matches and tournaments
- Bonus rewards for betting with $hPEPE vs. other currencies

2. Governance via DAO

$hPEPE holders will gain voting rights in the Pepe DAO, where the community decides:

- New game formats
- Frog names and themes
- Fee structures
- Platform upgrades

"The frogs may race, but the holders run the show."

3. Buyback & Burn Mechanism

A portion of platform-generated revenue (from betting fees and other in-game activity) will be used to:

- Buyback **$hPEPE from the market**
- **Permanently Burn It,** reducing the circulating supply

This creates **deflationary pressure** over time, designed to increase long-term value for holders.

4. Staking & Passive Earnings

Coming soon: Stake your $hPEPE and earn:

- Additional token rewards
- Entry tickets to exclusive games
- NFTs and merchandise perks

Designed for Community, Not Whales

- Fair launch and decentralized allocation
- No single party controls the token
- Community-first design ensures long-term sustainability

Future Integrations (Planned)

- NFT Boosts: Rare frog skins or abilities tied to $hPEPE ownership
- Tiered Betting Pools based on token holdings
- VIP tournaments are accessible only to top $hPEPE holders

In short, $ hPEPE is your access pass, control key, and reward engine — all in one meme-powered coin.

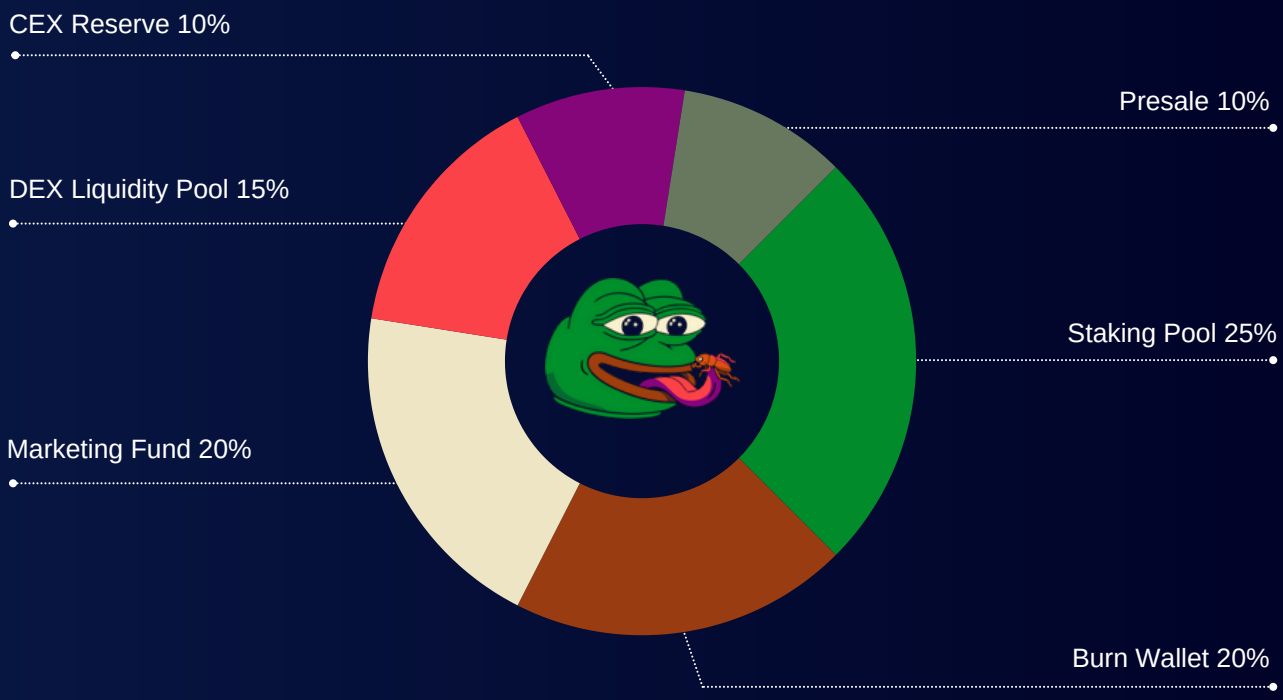
CHAPTER 6:
TOKENOMICS

Total Supply: 1,000,000,000 $hPEPE

No inflation. No surprises. $hPEPE has a fixed supply of **1 billion tokens,** thoughtfully allocated to drive ecosystem growth, incentivize community participation, and ensure long-term sustainability.

Token Allocation Breakdown

Category	Allocation	Purpose
Burn Wallet	200,000,000 (20%)	Immediate burn to create deflationary supply pressure from day one.
Presale	100,000,000 (10%)	Offered to early supporters with escalating price model and lock period.
DEX Liquidity Pool	150,000,000 (15%)	Ensures smooth token trading at launch with liquidity locked.
Marketing Fund	200,000,000 (20%)	Powering influencer campaigns, partnerships, and viral expansion.
Staking Pool	250,000,000 (25%)	Robust staking rewards to incentivize long-term holding and platform use.
CEX Reserve	100,000,000 (10%)	Reserved for future centralized exchange listings to expand access.



Total Supply: 1,000,000,000 $hPEPE

- **Presale Price:** $0.009 per token
- **Dynamic Pricing:** Token price increases every 48 hours during the presale.
- **Supply Cap:** 100,000,000 tokens allocated to presale.
- **Soft Cap:** $3,000,000 USD
- **Hard Cap:** If momentum builds, the hard cap will be pursued with community input.
- **Unsold Tokens:** Any unsold presale tokens will be burned, reducing total supply.
- **Lock Period:** Presale tokens are locked for 10 days post-launch to stabilize initial liquidity.

Staking Rewards

The largest allocation (25%) is dedicated to staking — ensuring strong incentives for long-term supporters:

- **During Presale:** Up to 200% APY
- **Post-Launch Standard:** Steady 30% APY to reward holders and keep liquidity healthy.
- Staking is core to the ecosystem's growth, driving both participation and price stability

Burn Strategy

PepeHunt takes a proactive deflationary approach:

- 20% of total supply burned from the outset.
- Unsold presale tokens are also burned, further reducing supply.
- This tightens the circulating supply and creates upward price pressure over time.

Sustainability & Trust Factors

- **DEX Liquidity Locked:** At launch, liquidity will be locked to prevent manipulation.
- **CEX Reserve:** Dedicated supply reserved for future centralized listings, broadening global accessibility.
- **Transparent Community Governance:** Future token allocations (e.g., ecosystem incentives) will be community-guided.

CHAPTER 7:
ROADMAP

Where We're Going — and How We'll Get There

PepeHunt isn't just a one-off meme coin. It's an evolving platform blending real-world entertainment with decentralized finance. Our roadmap is structured across three core phases; each focused on building credibility, expanding functionality, and creating viral growth.

Phase 1: Launch & Community Formation

Status: In Progress

- Branding & Token Creation
- Smart Contract Development
- Website & Litepaper Release
- Initial Marketing Campaign
- Community Building (Telegram, X/Twitter, Discord)
- Public Presale Launch
- LP Lock & Token Listing on DEX (Solana or Base)

Goal: Kickstart the community and raise liquidity through a fair, transparent presale.

Phase 2: Platform Activation

Status: Near-Term Buildout

- First Live Frog Betting Arena Launch
- Multiple Daily Frog Matches
- On-Chain Betting UI + Livestream Embed
- Odds Adjustment System (Polymarket-Style)
- Referral & Airdrop Campaigns
- Token Utility Activation (reduced fees, DAO voting)

Goal: Transition from token launch to fully operational platform with daily user activity.

Phase 3: Growth & Gamification

Status: Post-Launch Expansion

- NFT Integration (Rare Frogs, Betting Boosts)
- Frog Tournaments & Bracket Matches
- DAO Governance for Feature Voting
- Centralized Exchange Listings
- Merch Drops & Meme Contest Prizes

Goal: Turn PepeHunt into the go-to Web3 destination for fun, entertainment, and community-driven betting.

Long-Term Vision

We envision PepeHunt becoming:

- A **viral meme-powered brand** that bridges IRL content and on-chain betting
- A **community-owned frog betting league,** complete with tournaments, partnerships, and creator-hosted games
- A launchpad for future **PepeHunt spin-offs** featuring different animals, formats, and tokens

The roadmap is ambitious but achievable — just like your frog when it's chasing that bug.

CHAPTER 8:
GET INVOLVED

Join the Hunt. Own the Meme. Win the Race.

PepeHunt isn't just a project — it's a movement at the intersection of entertainment, crypto, and community.

Whether you're here to bet, earn, laugh, or lead — there's a place for you in the PepeHunt ecosystem.

Join the Community

The frogs are only as strong as the pond they leap from. Plug into the PepeHunt community:

- **Twitter / X:** @PepeHuntOfficial Get the latest updates, memes, and match highlights.
- **Telegram:** t.me/PepeHuntJoin our global community chat. Ask questions, drop memes, and win giveaways.
- **Discord:** Coming Soon for game coordination, community roles, and NFT utility expansion.

Join the Community

- **Website:** https://pepehunt.com
- **Bug Reports / Feedback:** support@pepehunt.com

FINAL WORDS

PepeHunt is about more than just frogs.

It's about betting on genuine randomness, creating shared experiences, and building a community-driven Web3 entertainment brand like no other.

If you've ever wanted to say, "I was there when it started," — this is your moment.

Pick your frog. Place your bet. Join the revolution.
